# BULK TRAILER RANGE

## Hydraulic brakes

The AgriCAD multi-purpose low speed bottom dump trailer with hydraulic brakes offers the farmer an affordable solution for the challenges of handling bulk loads of grain during harvesting. With the removable sides it is possible to be used as a flatbed for the transport of other products when not harvesting. The weight distribution carries as much as 2.5 ton over to the tractor's towbar, giving the tractor enough traction to tow the trailer in and around the fields.

### Models

RT180 - 14.5 ton payload

RT270 - 22.5 ton payload

Implement characteristics:

- Hydraulic braking system
- Removable side panels
- Very high discharge tempo
- Locks and landing gear is hydraulically controlled by the driver from the tractor's cabin
- Modular design enhances the replacement of the welded components
