FERTILIZER APPLICATOR **RANGE**

Reduce risk during planting

Applicators have a proven track record in USA, Canada and Europe. The AgriCAD applicator is the first locally built machine with the bulk of the components locally produced. Less downtime during plant time (caused by fertilizer refilling), therefore more hectares per day can be planted. Farmers who are already using these applicators are amazed at how this addition is optimizing their production.

Implement characteristics:

- 7 000 litre tank capacity (2 x 3 500 litre tanks)
- 80 litre/min. oil flow required
- Differential application through RTK *Real Time Kinematic*
- Available in 6, 8, 12, 16 & 24 rows with 3 feet or 2.5 feet spacing (adjustable application width)
- Liquid fertilizer can be placed at a depth of 80mm
- Fertilizer coulters are mounted with SKF Agri Hub
